PROFESSIONAL EXPERIENCE

HR Manager / Process Automation Lead | AJIT ZONE PVT. LTD.

Mar 2025 - Present

Delivering analytics, MIS and automation solutions across workforce and business operations for a 70+ employee organisation.

- Designed and implemented management dashboards and KPI reports for workforce, payroll, attendance, productivity and operational monitoring.
- Automated payroll processing and digital payslip distribution, reducing salary-related employee queries from 20-30 cases per month to 2-3 cases - an improvement of more than 90%.
- Built a centralised Performance Management System integrating attendance, daily reporting and productivity metrics, reducing monthly report preparation time from 2-3 days to approximately 30 minutes.
- Developed attendance analytics to track late arrivals, half-days, trends and workforce discipline, improving visibility for management decisions.
- Created task allocation and productivity tracking workflows with automated reminders and status monitoring, contributing to an estimated 30% improvement in employee productivity.
- Developed training scheduling and monitoring systems with calendar integration, completion tracking and feedback reporting.

HR Executive | SBC COOLING

Apr 2024 - Mar 2025

Supported HR operations while maintaining employee data, MIS records and recurring operational reports.

- Maintained HR MIS reports, employee records and operational documentation for accurate workforce reporting.
- Supported payroll processing, compliance activities, full-and-final settlements and employee documentation.
- Managed recruitment and onboarding for technical and non-technical positions and supported performance management initiatives.

KEY ACHIEVEMENTS

- Reduced payroll query volume by more than 90% through automation and transparent digital payslips.
- Reduced performance reporting effort by over 80%, cutting preparation time from days to approximately 30 minutes.
- Improved employee productivity by approximately 30% through task and workflow automation.
- Improved content operations productivity by approximately 40% through centralised workflow tracking.

SIGNATURE ANALYTICS & AUTOMATION PROJECTS

Payroll Analytics & Automation Platform Automated payroll calculations and one-click payslip distribution; reduced payroll-related queries by more than 90%.	Performance Analytics Dashboard Integrated attendance, daily reporting and productivity data; cut report generation from 2-3 days to 30 minutes.
Workforce Attendance Analytics Tracked late arrivals, half-days and attendance trends to support data-driven workforce discipline and planning.	Operational Productivity Tracker Enabled task assignment, automated reminders and completion visibility; improved productivity by approximately 30%.
Warehouse Picking Automation Generated rack, row and bin-level picking slips to reduce product search time and improve warehouse efficiency.	Content Workflow Analytics Centralised video editing workload and pipeline tracking; increased team productivity by approximately 40% and improved data accuracy to 80-85%.
